

Active & Recovered Covid-19 Case Progression Lincoln County

This graph shows the number of active cases, recovered cases, and PUI counts on a given date over the 147 day window.

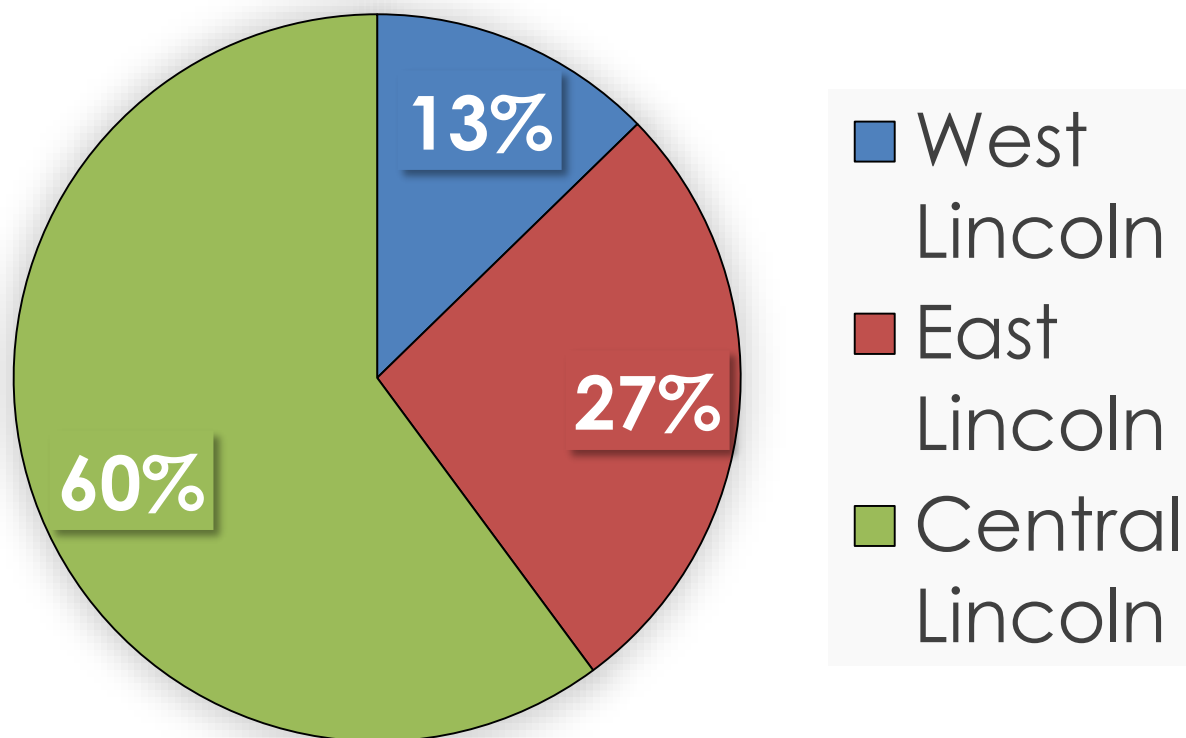

COVID-19 Cases Lincoln County

An epidemic curve (epi curve) is a chart used in epidemiology to view the onset of a disease outbreak. It can also show the disease's magnitude and its trend over time. Epi curves generally show the frequency of new cases compared to the date of disease onset. This trend line represents the best fit for describing the data relationship.

CASE DEMOGRAPHICS

Regional COVID-19 Presence

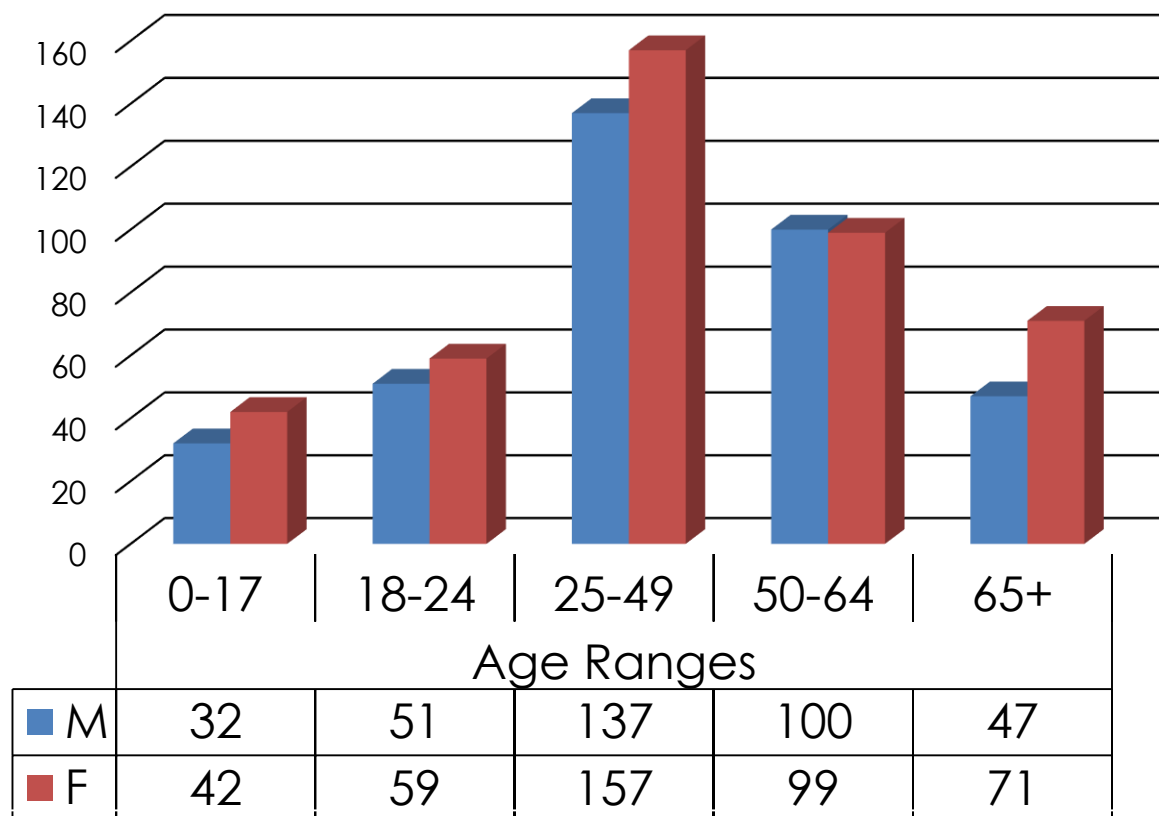

This chart provides general information on geographic regions that have identified cases.

Note: This information does not infer any region of Lincoln County as having more or less risk factors.
