

Lincoln county continues to see our most active degree of positivity to date. From the beginning of October, approximately 11.4% of diagnosed positives were between the ages of 0-17. An increase in positives cases in this age demographic. In contrast, approximately 16.7% of the resulted positives were in the 65+ age demographic. This is a decrease in positive cases for seniors in the past 14 days.

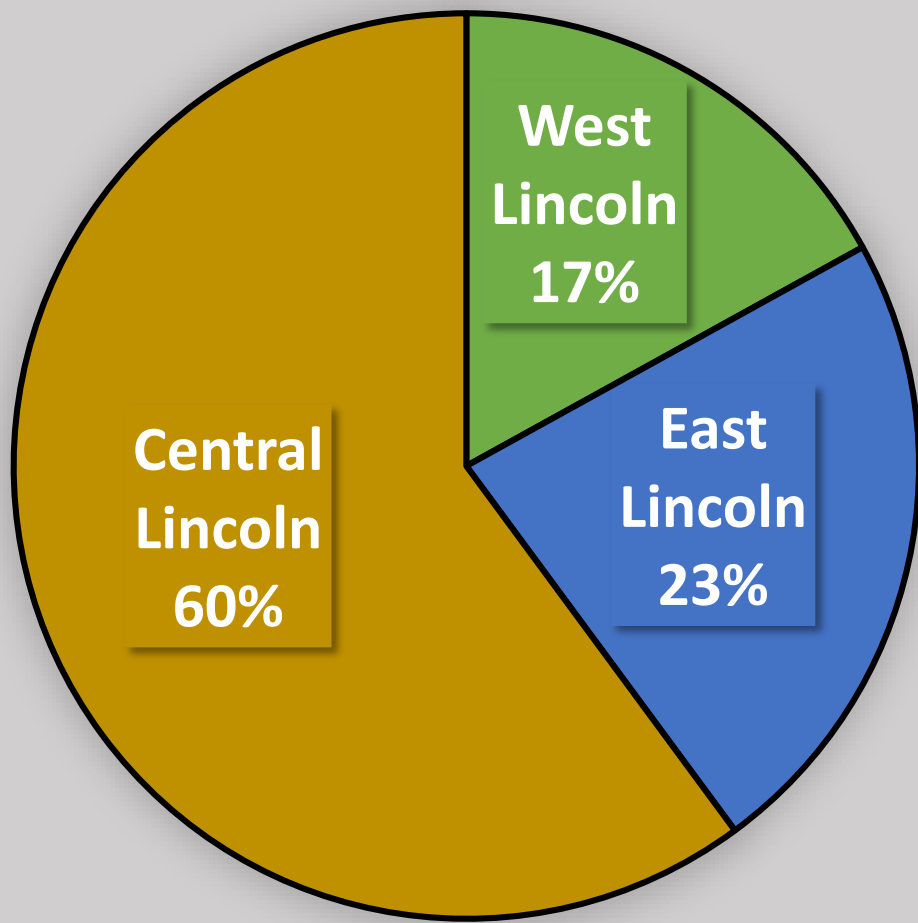

This graph shows case count by test date from October 13th-October 27th.

This graph shows the number of active and recovered case counts on a given date over a period of time.
